

Info - Getting Access

Currently users can self sign-up via the invite URL as Im notified every time someone signs up and I can ensure that only known people are allowed to sign up

By following the [signup process](#) you will create yourself an account that works with

- ☒ Streaming Media Server
- ☒ Media Requests
- ☒ File Browser

Currently you require an [SSO account](#) for accessing

- ☒ Metube Youtube Downloader
- ☒ Bookstack

I have left AliasVault Password Manager un-associated with either account process as that is intended to be secure and seperate for your safety

All systems are generally available and may have sporadic outages however the AliasVault service is only stopped due to errors

You can check how services are available via

- <https://status.pknw1.co.uk/status/pknw1>
- <https://status.pknw1.co.uk/status/all>
